

Roland Seguin
Gray, Maine

It is very unfortunate that the Dept of Inland Fisheries and Wildlife does not currently have the ability to assess the full impact of boat racing in issuing permits. I believe that this is really an oversight from when the powers of MDIFW were defined. Surely the State doesn't want to adversely effect it's beautiful lakes and the wildlife that thrives in and above them. I encourage passage of this legislation to protect the lakes of Maine, one of our greatest resources.
