

Kelly Barham  
Freeport

Hello, please hear my testimony as a resident of Freeport often disturbed by ear splitting airboat noise, at all hours of day and night. While I deeply respect the working waterfront of our beautiful state, this noise, like the sudden need of everyone to use leaf blowers, is actually an unnecessary and extremely unfriendly way to go about one's business. Surely we can all exist together, let school teachers sleep at night and have peace in the day while they are forced to teach from home, and let those who work on boats do so in a way that supports our community spirit rather than divide us. I am happy to buy the fruit of their labor, but cannot do so when it causes such harm. Thank you.
