

Ali Bushman
Freeport

Dear Committee Members,

As a third generation Freeport waterfront homeowner, I plead with you to reject the current proposal regarding air boat noise levels. I have spent my life living on the water, and enjoying the sites and sounds of commercial activity on the Bay. This is different. I have recorded decibel readings as high as 96 from inside my home. Family members (especially young children) are regularly awakened very early in the morning. Conversation in our yard must stop when an airboat passes us by, because the noise level is too high to hear each other. I have never experienced another commercial or recreational vehicle to be this disruptive in my lifetime.

I beg you, please work to find an alternate solution to support aquaculture and residential life on the Bay.

Very sincerely,

Ali Bushman
