

Andrew Farrell
Yarmouth

I am writing to express my concern about airboat noise and my opposition to LD 114. I don't begrudge the fisherman their right to make a living but there has to be some acknowledgement that the noise pollution is very real and the effects on the natural world, above and below the water, is thus far poorly understood. If the human response to the noise is any guide then the fish and birds likely aren't too fond of them either.
