Freeport

I strongly oppose LD 114 due to the injurious nature of the decibel levels that this bill permits. The noise levels are significantly high to damage hearing, particularly in the young. The noise levels that are permitted in this bill disturbs our wildlife and nesting birds, disturbs the sleep of those who live along the waterfront, and disrupts any normal conversation during the day as the boats go by. Given that we know the harmful nature of this noise, I would ask you to please oppose this bill and protect the nature and well being of all of us who live near or along the water. thank you.
