

Glenn Michaels  
Brunswick

I would truly appreciate the opportunity to have a video which I created played as part of the hearing. It is under five minutes and can be found on YouTube at the following address: <https://youtu.be/7GuA-1o9qJ4>. There are photographs and videos (with important audio) which clearly demonstrate the impact of airboats to me and other Brunswick Residents. I live on Maquoit Bay facing the clamming flats at low tide. I have no problem with Clammers using airboats because I have clammed without them when I was younger. However the noise is excessive and unnecessary and a reasonable noise level will not have any negative income on the clammers' income. It should only add 5 minutes to their trip each way. The attached photograph on my Word Document demonstrates the number of airboats, boats and clammers on a given summer day on the Bay in front of my house. This is only a partial listing of the boats and Clammers that I see from our property. I would like to please have the photograph distributed and/or shown at the meeting. If possible, I would welcome the opportunity to introduce my video with the photograph taking less than one minute. Thank you for your invitation and this opportunity to express my opinion on the important issue.
