Freeport

Thank you for your work on airboat regulations. We live about 1/4 mile inland from the Harraseeket River. Too many mornings we have been awakened in the early hours of the morning by the roar of airboats on the river. Surely something can be done to restrict their noise levels, especially before 7am. While LD 114 would probably improve the situation, I understand that LD 89 will place lower limits on airboat noise and would therefore be my preferred solution. I appreciate whatever you can do.
