

Kendall Stratton
President of Fort Frontier ATV Club - Fort Fairfield

The only reason that I'm against the weight/width limit is because I know of a big farmer up here in Aroostook County that opens a lot of land to ATVing and snowmobiling and they do a bit of ATVing and snowmobiling themselves.

If it wasn't for this farmer, we wouldn't be able to connect to many neighboring towns.

Their machines are used for both recreation and farming. Their current (and future) UTVs weigh in at 2,400 lbs.

It's in their opinion that if they aren't going to be able to operate their "oversized" machines on the trails to get from field to field or to recreate, they're going to close off all of their land to all ATVs.

Don't let this happen!

If they allow the ATVs on their farms, we should allow their oversized machine on the trails.

Be sure to include something in the new law that let's ATVs & UTVs that are registered to a farmer on the trails, no matter how big they are.
