Brunswick
LD 693

Please pass LD 693. I summer on Lake Androscoggin and for the last 3 years we have had trouble with algae blooms and invasives species. Wake boat will make both of these worse.

Our lake is quite shallow and wake boats stir up the bottom causing more phosphorus in the water leading to toxic blooms. The waves produced by them also can injure loons ,small children and pets. With their ballast tanks, they are a set up for transferring small particles of invasive plants from one lake to another.

Please protect Maine lakes.
