

Jeffrey Richardson  
Standish  
LD 814

I'm writing in opposition to Ld 814 as a life long outdoorsman's who has seen what the coyotes have done to the deer herd in Northern Maine to the personal lose of pets by friends from these killing machines. These coyotes were not native to Maine arriving in the late 70s and by the late 80s were in a lot of the state and continue to increase in numbers today. WE should be doing what ever can be done to control these killing machine before we lose not lonely the family pets but a small child or in the case in Canada a hiker .
