Hello All,

Approving this bill is the very LEAST that can and should be done to protect native Coyotes, our native wildlife. It is embarrassing and sheer insanity that Maine fosters killing coyotes, period, much less all of the time. I have seen for years those who think killing is great fun and in doing so starve the dogs, run them ragged, cage them out in freezing weather, and more. Allowing hunting of all native wildlife "should" be history. It is long past time for leadership to step up and protect native wildlife and in so doing recognize their role and value in our food webs and what life on this planet depends on. PLEASE safeguard and protect wildlife. And considering increasing the fine to \$1500.00. Thank you.
