Please pass this bill to enhance protections of our beautiful Maine lakes from invasive aquatic plants. Lakes are an important part of our tourism economy as well as adding to the quality of lives for many, many Mainers. Our precious waterways are a large part of what makes Maine such a wonderful state. The presence of invasive plants is increasing. Many lakes including ours (Kezar Lake in Lovell) rely completely on volunteers to monitor the shoreline. I am one of those volunteers. Please help support those of us trying to keep Maine lakes safe and clean. Thank you very much.
