Population of coyotes is growing in sabattus where I hunt and see them in surrounding towns. I have found mangled carcasses while hunting have alot more coyotes on camera than deer.I know of people that have lost pets and livestock to coyotes i agree that they definitely have a place and role in the chain but need to be kept in check do not change the way it is I do NOT support this bill this will also put a hurt on the sportsman and hobbiest that spend thousands on night hunting equipment and due to work is the only time they get to enjoy hunting and using their hard earned equipment
