It's really disappointing that we keep revisiting and wasting time and resources on a coyote bill. We all know that even with the current open season we barely keep the numbers in check. If you have seen what coyotes are capable of no one would think this is a good idea. Please don't ruin our deer herd by allowing this bill to take place it is a complete waste of resources to keep discussing this if we can't hunt coyotes year round we won't have any deer left please I pray to god people have more sense than to let this happen. I've spent the last 40 years in the Maine woods trust me this can't be allowed to happen !!!
