

Warren Dorr
Harrington
LD 716

I oppose LD 716. Coyotes are an invasive species and should not be regulated any more than they already are. Coyotes are over run everywhere in Maine now as it is. Look at the places like Portland and Bangor where coyotes are going right into neighborhoods eating pets and threatening humans. That's what the entire state will be like if these laws come into effect. The state makes alot of money off deer turkey rabbit and grouse hunting. No one is going to participate in that hunting and spend lots of money doing so in the community if there is no game to hunt. Thank you
