

Connor Jackson  
Searsport  
LD 716

I Connor Jackson I am against LD 716. I am against this because I have seen what coyotes do and are capable of first hand I have walked into numerous small deer yards over the years with 5-20 kill sites from coyotes and unlike the old saying "they only go for the young and the sick" that is false a coyote will go after any deer it wants and is more than capable of bringing it down. I am currently working in Brewer Maine and I see 1-4 coyotes making their way into Bangor every other day in my morning commute. Their population is always increasing, if this bill passes the population will continue to increase more rapidly meaning more will move into cities and urban areas increasing the chances for people to be attacked and pets to be killed because they have no fear of humans when they are comfortable.
