I am against this act to restrict my hunting rights and access to help do my part in maintaining the deer and wildlife population. I am an avid deer hunter as well as my whole family and we depend on the access to that and if we cannot keep the coyotes at bay population wise then we will see a major decline in deer. It's already a stated research fact on multiple sites that 1 adult coyote can kill 20 deer a year. So I am against this restriction and any group that tries to take that freedom away from me just because they don't like the sport.
