

Derek Williams
South China
LD 716

I do not support LD 716. As a farmer owning property in China coyotes are a huge problem for my live stock. Since allowing coyote hunters to hunt my property it has helped tremendously. If this passes it will have a negative affect on many people. With the limited amount of people hunting them we need to continue to hunt them year round to keep the population in check. Not to the mention since they started hunting my property and ones around me I have noticed a much healthier deer population. We can't let people's emotions control how we manage or wild life populations. So please do the right thing and don't support this bill.
