I am speaking for the many generations of my family that have had access to Swan Island since the mid 1900's . There is too much history, nature, wildlife to be ignored that Swan Island offers . In the day of families struggling to afford family vacations Swan Island is the obvious solution to family enhancement. I am in favor of a private ferry service providing transportation to and from the island but they must have access to the current docks . I personally and the generations before me would be devastated to lose such a gem ! I currently serve on the Richmond select board and if there is any conversation to be had concerning Richmond's part in preserving this opportunity for families to enjoy Swan Island we would be happy to oblige.
