Freeport

Senator Carney, Representative Hartnett and other members of the Judiciary Committee:
I would like to testify in support of LD 1292, which would require parental consent for all medical procedures, including administering vaccinations involving minors. This bill also requires the Department of Health and Human Services to obtain permission from a parent or guardian before placing an infected minor in isolation during a public health emergency. It is never OK for the State to usurp the right of the parents in deciding what is best for their children. Thank you to Senator Keim for sponsoring this legislation.
