LD 152

I think LD 152 is a great idea. It will assist concerned citizens to request and receive information regarding a proposed project with regards to Agency review in a prompt fashion. Many application reviews have a limited time frame for review . If a concerned citizen wants to bring more pertinent information forward to the review process then they in turn need to be able to view the submittal to date promptly. Government needs more transparency and I believe this Bill will assist to that goal.

Thank you,
