Biddeford
LD 1126

I am writing in opposition to LD 1126.

Home fabrication of firearms is a protected American tradition and right.

Making it unlawful to do so without going through an FFL is a gross violation of that right and a flagrant attempt to create a firearm registry.

Code is speech and protected by the 1st amendment. Even the code used to 3D print guns. Especially that code, actually.

This bill is in violation of the first two rights enumerated by the Bill of Rights. These rights are the top two for a reason.

I urge you to vote against this bill.
