Large capacity ammunition feeding devices endanger the lives of Mainers. I support hunting guns and guns for personal defense, but I do NOT support a gun owner's "right" to have a military killing machine to use at will. Nearly all of the mass shootings are committed using machine guns or rapid fire guns. I don't understand how we got to the point in the U.S. where the right of a gun owner to own a weapon of war is more important than the right of children to safely attend school.
