

Mary OConnell
South Portland
LD 677

I write in support of LD 677. The proliferation of machine guns and other kinds of rapid fire devices including the conversion devices that make it possible to fire faster has led to a large number of multi-death incidents across the country. Given the limitations of federal law, it is up to states to put in place more comprehensive legislation that will protect all of us from the horrors that can result from the use of these weapons. LD 677 would be part of a comprehensive set of laws for Maine that will improve public safety.
