LD 1109

"I oppose LD 1109, and LD 1126 and "they ought not to pass." Both of these legislations are driven by fear without facts! During the last 6 months across the globe firearms are no longer the weapon of choice for mass fatalities. More and more vehicles are being used for such incidents. Should we now pass laws concerning vehicles being used as weapons? If so the banning of electric vehicles because they are quiet might be appropriate. An electric vehicle is equivalent to a silencer. Magazine capacity and serial numbers will have zero effect on the use of automobiles as weapons! Further there is no evidence that either of these bills will reduce or limit fatalities.
