

Janice Vance
Kennebunk
LD 424

Dear Sen Carney, Rep Kuhn, Members of the committee, I am Janice Vance and I live in Kennebunk. I am opposed to this bill. Gun violence is the leading cause of death for the 18-21 age group, regardless of whether someone is serving in the Armed Forces. Young adults do not fully develop the prefrontal cortex that affects planning, decision making, impulse control, emotional regulation, and reasoning until age 25 or even later. In my opinion, no young person should have access to firearms until age 25. Thank you.
