Access to reproductive care, including abortion, affects the health of all families in Maine. Bearing and bringing up children is one of the most important jobs anyone can do to support the health and growth of our communities. If potential parents are struggling financially, mentally, and/or physically they won't be as able to support a child's growth. People, both men and women, need to be able to choose when to have children by having excellent reproductive health care, including abortion, to create healthy families.
