Shapleigh
LD 975

LD975 Should be passed overwhelmingly. Passing this Bill will automatically removed all of the other absurd abortion Bills.

Science has proven that life begins at conception, hence abortions murder human lives.

Imagine all the politicians, doctors, nurses, teachers, clergy, police, military, et al, great human beings we've lost to abortion.

God please have mercy on our souls, and especially those souls that approve of the killing of the most innocent of human beings.

I do not want my money going to this horrific issue, as well as lots of other stupid things politicians send my money to.

Please keep abortions out of the State of Maine.

Don't do what you did for LD1619. I was there in person for the two events at the Capital. More people showed up to oppose abortion, even after viability of the baby in the womb. Majority showed up to oppose this Bill, and the Judiciary Committee decided to ignore that majority.

This Congress is way too following party lines and not at all listening to the people of Maine.
