I strongly urge the Maine Legislature to adopt any and all pro life measures. The pro life position is not only morally right but also increasingly becoming the position of the general public. Do not fall for the pro abortion lies. None of them hold up to scrutiny. When does life begin? When does a human have rights? What reason is acceptable for one to end the life of another? Honest answers to None of theses questions falls on the abortion side.

In the 90's the motto was safe, legal, and rare. What changed?
