Bremen, Maine
LD 975

Sirs and Mame, please pass LD 975. Don't ignore the real evidence of testimony of women like me who have now been forgiven by God, but also who are still forever in remembrance of having killed a human being who I carried in my womb at age 18. When your teacher would be fired from his job because of your pregnancy, you cave to the pressure from him. It's not a reason to kill and it never is. My life was not at risk, but I made a bad choice because I could. Adoption was and is the right answer and that man should have been fired from his job. It's like ignoring every ultrasound you have ever seen to think that this is not murder from the start of any pregnancy. Save the moms life if the pregnancy is eptopic but for no other reason don't kill more babies. Please pass LF975!
