I am against LD 887.

We the people need to stop trying to scare medical professionals away from doing their jobs, which is to provide health care. If these procedures were medically necessary then the medical professionals would be doing them. This places an undue burden on an already strained health care industry to see patients twice within 1 week for a procedure and process that has been being done safely for years. It also places an undue burden on the patient to pay for 2 doctors visits within 1 week that are not medically necessary. This would constitute a ridiculous level of control to be exercised by the government on the health care industry and is insulting to the medical professionals that faithfully serve their patients every day.
