I URGE you to vote OUGHT TO PASS on LD887, An Act to make manufacturers responsible for proper disposal of abortion drugs and require a health care provider to be physically present during a chemical abortion. I am not for abortion, but I do believe if a woman is going to have a chemical abortion a physician should definitely be present in case something happens. The drugs used should be handled properly by the manufacturer and the unborn child should be taken care of in a responsible way. This seems like very obvious legislation to a very controversial procedure. The days of backroom horrific abortions should be gone forever. This legislation helps take care of the mother, makes the doctors and chemical companies accountable, and seems much more humane. Please vote OUGHT TO PASS on LD887. Thank you!
