It is high time that we legislate men's cocks and balls, and use of viagra drugs. Clearly, men, especially white men, have the brain disease " want more money, more power". The repeated assault on my female body requires understanding that you have no rights to my body. Currently, US society provides minimal support to pregnant women, persecuting them now in many dysfunctional states in an atmosphere of continual lies. The testosterone floating around continues to enable warring and the protectionism of women made afraid of their own shadow. Female oppression has led to classic survival strategies by weak women, seeking a strong man, like a tyrannist, per understandings explained in Pedagogy of the Oppressed by Paulo Freire in the 1960 s, still relevant today.

Every bill attacking women's control over our own bodies by these repugnant forces must be neutered. It is time to PUNISH men and these weak women, striving to not only control us, but destroy us and our progeny. GET OFF MY BODY, MIND, and SPIRIT.
