The true intent of this bill is incredibly see-through; with ICE kidnapping activists against apartheid off the streets in broad daylight without charge, and with universities suspending even Jewish students for their so-called "antisemitism" just because they have been bravely at the forefront of the Palestinian liberation movement, it is obvious that AIPAC-funded legislators who couldn't care less about discrimination are distorting "antisemitism" to conflate it with anti-Zionism (a valid and imperative critique of White supremacy), thereby perverting the law in order to have a legal way to repress any voices against this genocidal state despite our supposed first amendment rights. Shame on you all, anyone who still supports Zionism and lies about their true intent; since the resumption of the Israeli project's genocide, one hundred children are killed or injured by Zionist forces every single day in Palestine, all on the dime of the American taxpayer, and if the blood of children is cheap to you, then your psychopathy has only one prognosis. How many times does history have to repeat itself for fascists to realize their plans will always fail? Do you think this livestreamed holocaust won't come back to bit you? The entire world can see what you're doing outside of your little political bubble. May God not forgive you. Without a doubt, in this life and the next, you will answer for your atrocities.
