Maine Medical Association,
Maine Osteopathic Association, and
Maine Chapter-American Academy of Pediatrics**

IN SUPPORT OF:

LD 1743: An Act to Allow Municipalities to Prohibit Firearms Within Their Municipal Buildings and Voting Places and at Their Municipal Public Proceedings

Joint Standing Committee on Judiciary
State House, Room 438
Thursday, May 1, 2025

Good morning, Senator Carney, Representative Kuhn, and distinguished members of the Joint Standing Committee on Judiciary. On behalf of Maine Public Health Association (MPHA), Maine Medical Association (MMA), Maine Osteopathic Association (MOA), and Maine Chapter-American Academy of Pediatrics (MAAP), we write in support of LD 1743: “An Act to Allow Municipalities to Prohibit Firearms Within Their Municipal Buildings and Voting Places and at Their Municipal Public Proceedings.”

MPHA is the state’s oldest, largest, and most diverse association for public health professionals. MPHA represents more than 850 individuals and 70 organizational members across the state. MPHA’s mission is to advance the health of all people and places in Maine. MMA is a professional organization representing over 4,000 physicians, residents, and medical students in Maine. MMA’s mission is to support Maine physicians, advance the quality of medicine in Maine, and promote the health of all Maine people. MOA is a professional organization representing more than 1,200 osteopathic physicians, residents, and medical students in Maine whose mission is to serve the Osteopathic profession of the State of Maine through a coordinated effort of professional education, advocacy, and member services to ensure the availability of quality osteopathic health care to the people of this State. Maine AAP is a membership organization of 300 pediatricians and subspecialists across the state working to promote the health of Maine children.

LD 1743 would allow municipalities to prohibit firearms, other than for law enforcement, within public buildings and voting places, and at municipal public proceedings. Municipalities would be required to post signage about the prohibition and may issue a civil fine for violations.

Violence in America, and here in Maine, is a public health crisis that affects people in all stages of life, from infancy to older adults. It leaves physical and emotional scars, derails lives, and erodes communities by reducing productivity, decreasing property values, and disrupting social services.¹ Violence is also a vicious cycle – if someone is exposed to violence, they’re more likely to commit future violence.² Violence is a leading cause of premature death and disability in the U.S., and here in Maine.

Data show that different types of violence tend to co-occur, such that in areas where there are higher rates of community-level gun violence there are also higher rates of domestic violence and child abuse. At the community level, gun violence tends to occur more often in areas already experiencing social and economic disparities, including geographic racial segregation and concentrated poverty.³ Moreover, childhood trauma, including domestic violence and community violence, may be a risk factor for gun violence later in life.⁴ A public health approach to violence prevention fosters healthy gender norms and relationships, bolsters trauma-

informed services, limits access to firearms, and works to mitigate racism by changing norms and behaviors; collectively, these efforts lead to reductions in violence.⁵

Violence in the U.S.

- According to the [Gun Violence Archive](#), in 2024, there were 503 mass shootings, and 667 murder-suicides, in the U.S. Nearly 17,000 individuals lost their lives due to gun violence last year.
- To date ([May 1, 2025](#)), in the U.S., 4,600 people have died by gun violence, including 400 youth ages 0-17 years.
- Firearms remain the leading cause of death for children and teens.⁶

Violence in Maine:

- In 2023, 18.3% of middle schoolers reported that violence in their home, or the threat of violence, made them want to leave home, even if only for a short while.⁷
- Domestic violence represented 29% of total reported assaults in 2022.⁸
- 1 in 5 Mainers will experience sexual assault during their lifetime.⁹
- According to the Maine Center for Disease Control and Prevention, nearly 89% of firearm fatalities in 2021 were suicides, a rate significantly higher than the national average.¹⁰
- One of the deadliest mass shootings in America occurred here in Maine, claiming 19 people's lives.

Firearms are already prohibited in some public spaces, including courtrooms, airports, and even here, in the State House – this bill just extends that same protection to public municipal buildings, and for the same reasons that they're already prohibited in other locations – it's a matter of public safety. Limiting weapons in public spaces, especially those that can be emotionally charged reduces the risk of gun violence and supports public safety.

Gun violence is not inevitable. It can be prevented through a comprehensive public health approach that keeps families and communities safe, while respecting responsible gun owners. We believe this bill is protective of public health. As such, we respectfully request you to vote LD 1743 "Ought to Pass." Thank you for your consideration.
