Please vote NO on LD1379.

It is FACTUALLY and easily demonstrated that the prescribed warning is incorrect as made in paragraph 3. The State has NO business making Maine businesses give individuals State sanctioned warnings that are not accurate and supportable, nor actionable.

Second, such warnings are proven to be completely ineffective and inefficient. And waste money that could be better used elsewhere.

Just to give you some idea of the scope of your stupidity in proposing this consider this warning "WARNING: Consuming this product can expose you to Lead, which is known to the State of California to cause birth defects or other reproductive harm.". ITS ON EVERYTHING, nationwide. It's a running joke as it either causes completely unnecessary anxiety or is completely ignored. Did it affect your actions personally in any way? I guarantee not in the least and its on any number of things you individually handled. The same for this.
