I am appalled that with all the current issues facing our state, you in the legislature have chosen these non-issues to focus time and energy on.

They're has been no evidence that any of this legislation addresses real issues. It feels like nothing less than fear mongering to distract from real problems.

Why not turn your attention to issues like making up the shortfalls were about to experience from our president ruining Canadian tourism

Or passing a bill to close the shortfall in MaineCare funding.

Act to solve the real issues we have not the made up ones to make your base happy.
