Bingham, Maine  
LD 380

All people have a right to health care. What is needed should be determined by the individual, their doctor(s), and their mental health professional(s). Those decisions should not be influenced by local, state, or federal governments. Please do not take any steps to legally block access to any type of health care including gender-affirming health care services. To do so would put added strain on people in this already stressed minority and would lead to increases in mental health deterioration and suicides in this population. The Maine Legislature has a duty to protect all of its citizens. Please keep this fact in mind when voting on this bill. Thank you.
