LD 1704

I am against LD 1704. Transgender kids should not be forced to use facilities identified with a gender that is not their own gender identity. Instead, I would like to see that those people who are uncomfortable with sharing such spaces with transgender kids seek out private spaces for themselves, or that parents uncomfortable with the thought of their child sharing a bathroom with children whose gender identities don't match their gender at birth make their own arrangement for their child's use of facilities during the day.
