LD 1432

I am against LD 1432. Who benefits from "gender identity" being removed from the Maine Human Rights Act? Across place and time, transgender people have existed, sometimes in hiding, sometimes openly. This is not a "new phenomenon", and more than being gay is a new phenomenon. There is no reason to roll back progress in granting rights to all human beings. What's next, sexual orientation? race? gender? I see that no one truly benefits from this bill being passed, and that many people will be hurt if their rights are rolled back via a change in this language.
