I would have come in person to testify but I am currently 16 weeks pregnant, and have a prenatal appointment and ultrasound scheduled for today. This is the first child for me and my wife. We're very excited to meet our new Mainer in the fall!

Our child will have two mothers when they are born, one cisgender (that's me - the pregnant one!) and one transgender. We are equal in our marriage, we are equal in the creation of our child, and we should be equal in the eyes of the law. Please do not vote for these gross, stupid, unfair laws. I already have enough to worry about between the high risk pregnancy, getting the nursery set up, an arranging time off work. I don't need to worry about my wife being relegated to a second class of citizenship.
