LD 868

Honorable members of the Judiciary Committee

Thank you for your service to our State. I'm writing to urge you to vote Ought to Pass on LD 868. A person's sex always has been and always will be determined in the womb, and is not subject to feelings or choice. That there needs to be legal definition of and a law providing for separate facilities for women, and that we need to define them as biological women, and further define that as how their reproductive systems function is a heartbreaking commentary on our failure to love our children and seek their higher good. We need to support all of our children (and some adults!) and lovingly but firmly educate and assert that their sex is fixed. Please stop this appeasement of gender confusion and seek the best for the very small community of those who think they are not the sex with which they were born. They are hurting, and our playing along with their confusion is further hurting them and prolonging their pain. Please stand for what is right and end this foolish abuse of the majority of women in a misguided attempt to cater to issues that we need to correct in a very loving and careful manner.

Respectfully,
Mark Stevens
