LD 1337

Honorable members of the Judiciary Committee

Thank you for your service to our State. I'm writing to urge you to vote Ought to Pass on LD 1337. We need to protect women - biological women - in situations where they may be exposed to harm from a biological male, regardless of how the male chooses to identify themselves. That we are submitting these laws and having these conversations is a commentary on our collective failure to lead, to teach, and to care for the higher needs of our community. We are doing a larger harm to the community in general by accommodating the tiny minority who suffer from gender confusion. We are further harming those who suffer from gender confusion by playing along with their feelings rather than addressing them in a loving manner.

Respectfully,  
Mark Stevens
