

Holly Swartz  
union  
LD 380

Good Afternoon to the Judiciary Committee:

My name is Holly Swartz. I am from Union. I would like LD380 the bill to amend the “Gender-Affirming” health care services law to be passed. This law does not protect children. This law does not protect children but rather makes the citizens of Maine accomplices to legalized child mutilation and kidnapping. Any law which does not include parents while a child is a minor is greatly misusing the power of government. No minor child ought to be able to make life-altering decisions without the consent of his or her parents. No child should receive puberty blockers, which prohibit the natural process of growth to occur. This state government ought to be ashamed of itself. I know many nurses who can no longer practice nursing because they will not be a part of this wicked agenda; and make no mistake, it is an agenda and not a lifestyle choice. Thank you
