I would like to register my opposition to the proposed changes that remove protection under the law for gender-affirming healthcare services. The role of the state should be to protect the right of individuals (and their doctors) to make their own healthcare decisions appropriate to their situation. Both trans and non-trans people require at certain times gender-affirming care; their individual freedoms and rights should not be restricted just because a fringe group wants to push their weird obsession with transgender people into the mainstream. Please reject these changes to the law.
