The judiciary committee has five bills before them in this hearing - all five should not be supported. These bills intentionally & in an inflammatory manner, misrepresent the reality of trans students in Maine and trans student's participation in athletics. Trans students should not have their identity denied, and should not be made pariahs in their schools.

I am writing as a leader in my Quaker community and with the full support of my meeting. The heart of the Christian faith is welcoming all into communion.
