LD 2106

I am writing in support of LD 2106 and I urge you to vote this through. ICE has been terrorizing our Maine communities and creating mass fear for immigrants, asylum seekers, and citizens alike. All residents of Maine should feel safe to go to the hospital if they need help (this is also a public health issue), children should be safe to go to school and learn without worry of abduction, children should be able to play at daycare without fear that they will be taken or their parent will be taken picking them up, and our third places like libraries are vital spaces of learning, connection and resources. I urge you all to vote in favor so that judicial warrants will be required and ICE will not be able to operate with such brutal abandon. We count on you to protect our people, we have an opportunity here to do just that with LD 2106.
