LD 2106

Children, citizens and non-citizens, deserve to receive medical care, attend church, and attend school without fear and anxiety. ICE's actions are terrifying and traumatizing citizen and non-citizen children of Maine. Children are not receiving the care, education, and support they need because their families are too scared to leave their homes. I have young family members attending school in Portland. Their classes are empty of all but white children. Children of non-citizen families and non-white families do not feel safe leaving their homes and they are suffering. All children equally deserve care and protection. Please pass LD 2106 so ICE can not continue to act with impunity. All Maine's children deserve the chance to thrive.
