LD 2106

Dear Judiciary Committee Members: I am writing in support of LD 2106, as I am deeply concerned with the illegal deployment of masked, armed and unidentified Federal ICE Agents on the communities and citizens of Maine. I myself know families in the midcoast who are not sending their children to school no matter what their immigration status, or to public places like the library due to fear of being racially targeted , and illegally detained by this secret army. They are not allowing our own police to retain their dignity and trust in our communities! LE suddenly is something to fear for our children, not an agency to look to for care and safety! Every child in our state is now tramitized by this kind of unwarranted attack. No human being is " illegal", even if undocumented, simply looking for a way to work and keep their children safe! Please do what you can to change this terrible and dangerous atmosphere, for all of us--Vote yes, ought to pass on 2106. Thank you for listening.  
Meredith Bruskin, FNP
