

To Members of the Judiciary Committee

Maine is a state with a tradition of supporting neighbors. I am writing in support of LD 2106 which will allow our immigrant neighbors to feel safe in sensitive areas. This will also reduce the stress of medical providers, teachers, and other employees who are trying to navigate the presence of ICE. The guidance to employees will be invaluable. In addition, it adds a layer of protection for children of immigrants.

Unfortunately, this could be a matter of life and death.
